## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a fee estimation tool for professional services firm for estimating a cost of a new matter, classified in class 705, subclass 400.
- II. Claims 9-11, drawn to a management tool for a professional services firm, classified in class 705, subclass 32.
- III. Claims 12-16, drawn to a management tool for a professional services firm, classified in class 705, subclasses 34
- IV. Claims 17-19, drawn to a management tool for a professional services firm and a method for providing management reports, classified in class 705, subclass 32.

Invention I (1-8) has separate utility such as, a quoting module, a scoping module, and a management module, at least one of the modules operable to identify details of billed amounts for like, but completed matters and determine an estimated cost for the new matter using the billed amounts for the like, but completed matters;

Invention II (9-11) has separate utility such as, a quoting module, a scoping module, and a management module, at least one of the modules operable to identify details of fees for professional hours billed and a grade or category of fee earners involved for a plurality of like, but completed matters, and use this information to

Art Unit: 3628

determine what percentage of a total fee from the hours billed is provided by each grade or category of fee earner involved;

Invention III (12-16) has separate utility such as, a quoting module, a scoping module, and a management module, at least one of the modules operable to identify details of billed amounts for like, but completed matters, including an average cost and duration, and use this information to provide an indication of what costs are incurred at what stage of a matter; and

Invention IV (17-21) has separate utility such as, a quoting module, a scoping module, and a management module, wherein the modules are operable to use historical billing information for a plurality of like, but completed matters to calculate a number of professional hours and grade of fee earner for a new, but similar matter in order to meet an estimated fee using the historical billing information and provide an indication of the fee as a function of time for both the historical matters and the new matter; and

Inventions I, II, III, and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I, II, III, IV and V have different modes of operation and functions.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3628

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
